

NON INSULATED STEEL ACCESS DOOR

Non-insulated access doors are built in order to access anything that is found behind a wall or a ceiling. Since the elements that are located behind such walls or ceilings vary immensely, Cendrex's access doors are available in different dimensions and materials. In addition, different options are also complementary to this product.

Model: General purpose access door

VALIDATED ECO-DECLARATION

ENVIRONMENTAL DATA SHEET

NON INSULATED STEEL ACCESS DOOR

PRODUCT CONTRIBUTION SUMMARY

LEED® v4 requirements for Building Design + Construction (BD+C)

New Construction, Core and Shell, Schools, Retail, Data Centers, Warehouse and Distribution Centers, Hospitality and Healthcare.

LEED® v4 requirements for Interior Design + Construction (ID+C)

Commercial Interiors, Retail and Hospitality.

| MATERIALS AND RESOURCES | | PRODUCT CONTRIBUTIONS | |
|------------------------------|---|-----------------------|---|
| MR | Building Product Disclosure and Optimization – Sourcing of Raw Materials Option 2: Leadership extraction practices (1 point) Requirements - Use products that meet at least one of the responsible extraction criteria: Recycled content, Wood products Certification, Bio-based materials, Extended producer responsibility. | Contribute | ATTRIBUTES Recycled content Pre-consumer: 18.73% - 43.88% Post-consumer: max 32.01% |
| | Building Product Disclosure and Optimization – Material Ingredients Option 1: Material ingredients reporting (1 point) The product contributes to this credit due to the availability of Health Product Declarations®. They are valued as 1 whole product out of the 20 needed for the purposes of credit achievement. | | INGREDIENTS AND EMISSIONS HPD® version 2.3 Health Product Declaration® Validity May 2025 to May 2028 |
| INDOOR ENVIRONMENTAL QUALITY | | PRODUCT CONTRIBUTIONS | |
| EQ | Low-Emitting Materials Option 1: Product category calculation (1-3 points) Number of points is dependent on the LEED® rating system and the number of compliant categories. | Contribute | INGREDIENTS AND EMISSIONS Powder-coated steel is excluded from the scope of this credit. Moreover, powder-coated metals are inherently nonemitting sources. |

It is important to consider that the total amount of possible points reflects the number of achievable points in each credit category. The product itself cannot achieve this score, as defined above, but is considered as a beneficial element in order to achieve LEED® credits.

The data included in this Environmental Data Sheet has been provided by the client and the suppliers, who are responsible for its veracity and its integrity. Vertima follows a rigorous protocol, including an on-site audit of the factory, an audit of the manufacturer's supply chain documentation, and the analysis and validation of all supporting documents. However, Vertima cannot be held responsible for false or misleading information that may cause any loss or damage suffered, caused in all or in part, by errors and omissions relative to the collection, compilation and/or interpretation of data.
